

Errata

Erratum: On the unification of the gravitational and electronuclear forces
[Phys. Rev. D 26, 1916 (1982)]

Kevin Cahill

A minus sign is required before the connection in the covariant derivatives that act on lower indices. Thus in Eqs. (3.13) and (3.17) the derivatives D_μ^\dagger and D_μ^T should be replaced by $\partial_\mu - A_\mu^\dagger$ and $\partial_\mu - A_\mu^T$. Also, in the second sentence of the second complete paragraph in the first column on page 1921, the words "In general" should be replaced by "For some groups."

Erratum: Cosmological solutions of $N = 1$ supergravity in 11 dimensions
[Phys. Rev. D 30, 1394 (1984)]

Enrique Alvarez

In formula (6c), write $6\kappa_2$ instead of $2\kappa_2$. In formula (8b), write $-21/A^2$ instead of $-7/A^2$. In the paragraph before (9a), write $A > 21^{-1/12}(\kappa F_0 A_0^7)^{1/6}$ instead of $A > 6^{-1/12}(\kappa F_0 A_0^7)^{1/6}$. In formula (9a), write $8/A^2$ instead of $8/3A^2$. In formula (9b), write $-28/A^2$ instead of $-28/3A^2$. In the first full paragraph on p. 1396, delete the last two sentences "In all the cases . . . gravitinos." In the following paragraph, delete the last sentence "This is only possible . . . initial condition." Finally, Figs. 2 and 3 must be replaced by those shown here.
